

## **Sculptra Aesthetics**

Sculptra Aesthetic is intended for use in people with healthy immune systems as one time treatment regimen of up to four injection sessions that are scheduled about 3 weeks apart for correction of shallow to deep nasolabial fold contour deficiencies and other facial wrinkles.

You should not use Sculptra Aesthetic if you are allergic to any ingredient of the product or have a history of Keloid formation or hypertrophic scarring. It should not be injected while you have an active skin infection or inflammation in the treatment area and should not be injected into the red area of the lip. Side effects may include injection site discomfort, redness, bruising, itching and swelling. Other side effects may include small lumps under the skin that are sometime noticeable when pressing on the treated area. Larger lumps, some with delayed onset with or without inflammation or skin discoloration, have also been reported.

## **How does Sculptra Aesthetic work?**

Sculptra Aesthetic gradually replaces lost collagen. Collagen is a key structural component that keeps skin youthful looking and smooth. As you age your body's collagen production decreases, and you may begin to see wrinkles. Sculptra works within the dermis, your skins structure is reinforced as Sculptra Aesthetic helps to replace lost collagen. The reinforced collagen structure provides a foundation that gradually restores the look of fullness of your shallow to deep facial wrinkles and folds, that has been depleted over time. The result? Sculptra Aesthetic is different because it gradually and subtly corrects these facial wrinkles. This can provide a refined, more youthful looking appearance that can last more than two years.

## **Where in the face is Sculptra Aesthetic used?**

Sculptra Aesthetic is used to correct shallow to deep facial wrinkles and folds which are treated with the appropriate injection technique.
